

A trusted partner for over 50 years,
committed to helping patients
who need oral liquid medication.

Guided by feedback from pharmacists and healthcare professionals, we've redesigned our packaging to be more **modern, clear and easy to recognise, with distinct colours, drug name, and strength**. This change may help reduce the risk of medication errors and ensures compatibility with automated dispensing systems.

Clearer Packs. Better Experience.

Key product details are clearly visible and emphasised in bold for quick reference.

Product strength is colour-coded in both a roundel and in text, clearly displayed at multiple points on the packaging.

Side panels feature clearly presented critical information, while allowing sufficient room for including a pharmacy label.

Products are colour-coded to support accurate product identification.

Your patients' wellbeing is at the heart of everything we do

Portfolio of >130 oral liquid medicines across many therapy areas including gastrointestinal, cardiovascular and CNS.

Continually evolving our product range to meet the needs of patients with swallowing difficulties.

Our innovation centre in Leeds is where new ideas come to life – right from our manufacturing site.
